Affordable quality lighting with a long history

From small beginnings to an international presence, NEOLUX has been a reliable brand for affordable lighting products with quality standards for nearly a century.

German Technology Standards

Safety is one of our primary concerns. At NEOLUX, it is our mission to light up the roads ahead of you with bright quality vehicle lamps. That's why NEOLUX lighting products, which are engineered by our R&D teams in Germany, are tested throughout the production process and certified to meet a number of German and international standards, including ECE, SAE, CCC, RoHs, REACH, and ISO.

Good quality at affordable prices

The NEOLUX portfolio offers affordable lighting products that light the way ahead. Their effectiveness and brightness come at a reasonable price that allows you to benefit from German engineering without having to exorbitantly. The interior and exterior lamps manufactured by NEOLUX will light up your vehicle and the road ahead, making good on the "German technology made affordable" claim.

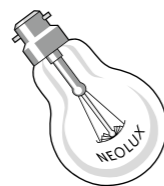

Broad product portfolio

NEOLUX offers a broad range of halogen, xenon, and LED lighting products for cars, utility vehicles, and motorcycles. It's important to us to provide suitable options for many different situations and preferences. That's why we also offer specialty options – such as Blue Light, Extra Light, and Extra Lifetime, as well as off-road products – so that you can have greater flexibility.

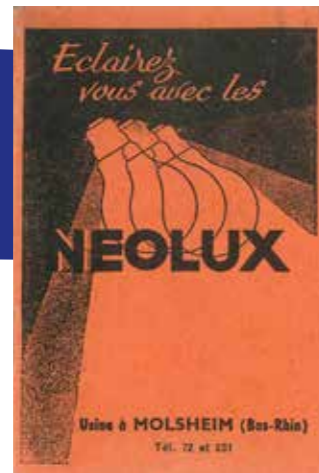

Experience with a rich history

For nearly a century, NEOLUX has been making quality lighting products. Our many years on the market back up the products we offer and the expertise that goes into designing and manufacturing them. In 2011, NEOLUX was launched as a registered trademark in automotive lighting, allowing us to shine a light on the roads of over 90 countries around the globe where we have a presence.

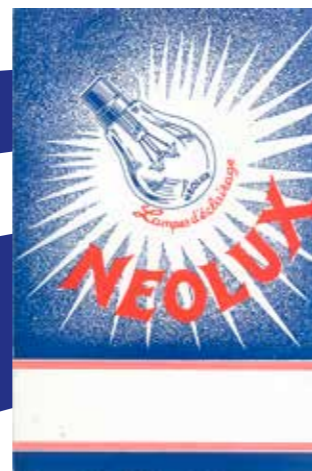

S.A. Lumière from Goldau, Switzerland, built a factory in Molsheim, France: La Lampe NEOLUX S.à.r.l., with 120 employees and an annual production of 800,000 light bulbs.

January 5, 1925: First trademark protection in France.

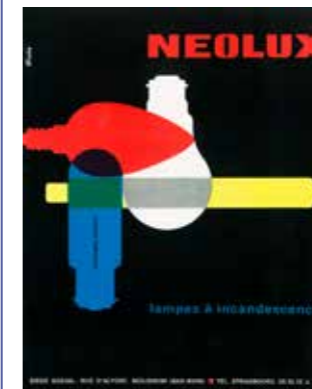

During the 1930s and 1940s, the company Interlux owned the majority of the company shares. At the same time, OSRAM gradually increased its shares in the company.

OSRAM Germany and NEOLUX signed an agreement to enter into a strategic partnership.

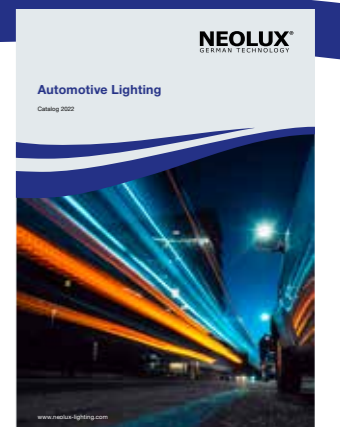

NEOLUX started to sell OSRAM products in France under the brand NEOLUX.

NEOLUX Molsheim was renamed OSRAM S.à.r.l. NEOLUX has been part of the brand portfolio ever since.

NEOLUX was launched as a brand for automotive lighting.

Today NEOLUX is OSRAM's official secondary brand in the automotive aftermarket. NEOLUX trademark is protected in more than 90 countries.

Avoiding safety risks through light

Most drivers think they have nothing to worry about as long as their headlights function – all they have to do is change their lamps if they break or burn out. But what if it takes a while before they get the opportunity to replace a broken lamp?

Until they do, they'll be driving with just one headlight. This leads to a level of low light that drivers often underestimate, resulting in a significantly reduced field of vision and therefore to an increased risk to safety. But drivers can prevent this by being more proactive in replacing their lamps before they go out.

Always in pairs

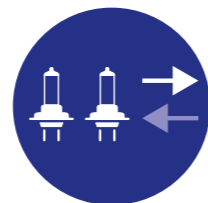

Over time, the amount of light produced by headlights diminishes. This means that drivers should regularly check that they still work – and replace them if necessary. It is recommended that they be checked once a year and exchanged every two to three years. But replacing just one lamp and not the other can lead to an imbalance in spotlight. The one replacement lamp will be brighter than the lamp that was not replaced, so it is important to replace the lamps in pairs to ensure optimal light output and visibility. Not doing so could also be a potential safety risk.

Products that add more value recommended

The quality among headlights can differ widely. Thinking ahead and replacing lamps before they become an issue

will give you more time to consider which lamps suit your needs best. Not all replacement lamps provide the same level of quality that comes with the lamps in a brand-new car. The best option is to go with a good quality, value-added product you can depend on and that offers a suitable design, light output and lifetime. NEOLUX's broad portfolio offers customers a diverse selection of adequate lamps based on their preferences and needs.

These include the "Standard" products as well as the performance lamps "Extra Light", which provide everything its name implies: extra light. With a longer and brighter light cone, these performance lamps provide better light compared to standard products, helping drivers spot dangerous situations sooner and more accurately, and thereby increasing valuable reaction times. Offering garages and customers good quality and performance products, NEOLUX's broad vehicle lamp portfolio makes sure drivers can always see in the dark.

Cars 12V Halogen headlight lamps

Car lamps from NEOLUX ensure the roads ahead are well-lit and visible to others.

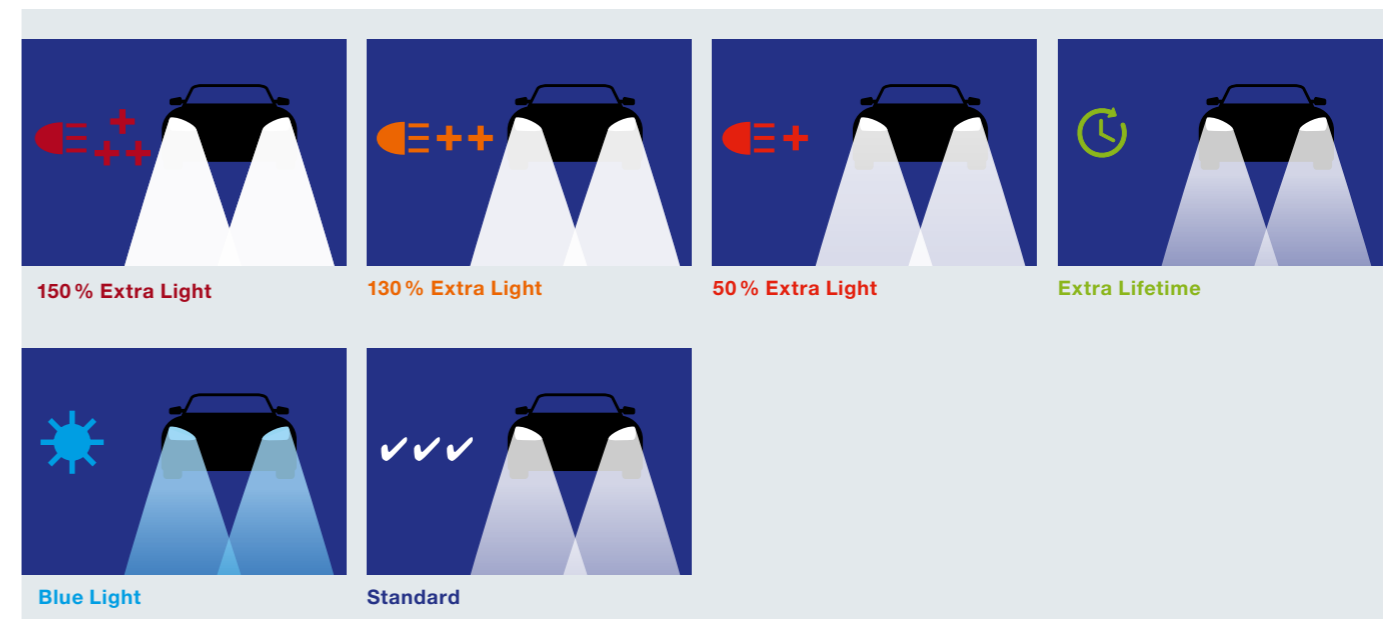

Extra Light, Blue Light, Extra Lifetime or Standard? The choice is yours!

The NEOLUX range of halogen headlight lamps offers solutions for almost any need:

- Upgrade your headlight with the brand-new 150 % Extra Light lamps that offer a higher performance over the 50 % and 130 % products. With a longer light cone and the ability to produce up to 150 % extra light, this lamp makes an ideal fit for those who are looking for more light.

- The bluish white light of our Blue Light 12 V halogen headlight lamps featuring xenon look give you a stylish appearance.
- With our Extra Lifetime headlight lamps, lamps need to be replaced less often. This gives you greater comfort and low-maintenance light for a longer period of time.
- The Standard 12 V halogen headlight lamps offer a variety of sockets and wattages for those who value a wide range and reliable quality.

Our 12V Halogen solutions

Cars 12V Xenon headlight lamps

The bright light and focused beam of the NEOLUX Xenon headlight lamps ensure a good view and visibility.

More light. Longer life.

The NEOLUX 12V Xenon headlight lamps are characterized by an especially long life and a light color and intensity which create a daylight effect. The result: a better-illuminated road.

Recommended xenon use

Xenon lamp change is recommended to be carried out by a professional and in pairs.

Product features

- Clear white and bright light
- Focused light beam
- Light color and intensity create a daylight effect
- Long lifetime
- Good quality thanks to German technology

Product benefits

- Better visibility
- Remarkable illumination of the road
- More light enables drivers to see farther and thereby allows greater reaction time
- Longer replacement cycle
- Suitable for many xenon headlights

Cars 12V LED headlight lamps

LED headlight lamps from NEOLUX provide you with better visibility and a cold white look.

LED headlight lamps for better visibility.

The NEOLUX LED headlight lamps upgrade vehicles with the latest LED technology that features a cold white color temperature of 6,000 K. The NEOLUX LED headlight lamps design makes easy replacement with the most common traditional lamps H4 and H7 possible and provide a homogenous and modern look. Through an even light distribution and a clearly defined cut-off line a better visibility on the road is enabled.

Product features

- Contemporary, cold white color temperature with 6,000 K
- High brightness
- Even light distribution
- Long lifetime
- Convenient replacement for traditional H4 and H7 high and low beam lamps

Product benefits

- Upgrade with the latest LED technology
- Modern look
- Better visibility
- Longer replacement cycle
- Simple installation

Cars 12V LED Canbus control

LED Canbus Control from NEOLUX helps you prevent LED lamp error messages.

LED Canbus Control for lamp error elimination. With the NEOLUX LED Canbus Control, you can eliminate error messages as well as indicator hyperflashing, both of which can result from the low amount of electricity used by LED retrofits. Through the thermal decoupling from the lamp, the LED Canbus Control ensures that the brightness and lifetime of your LEDs are maintained.

Product features

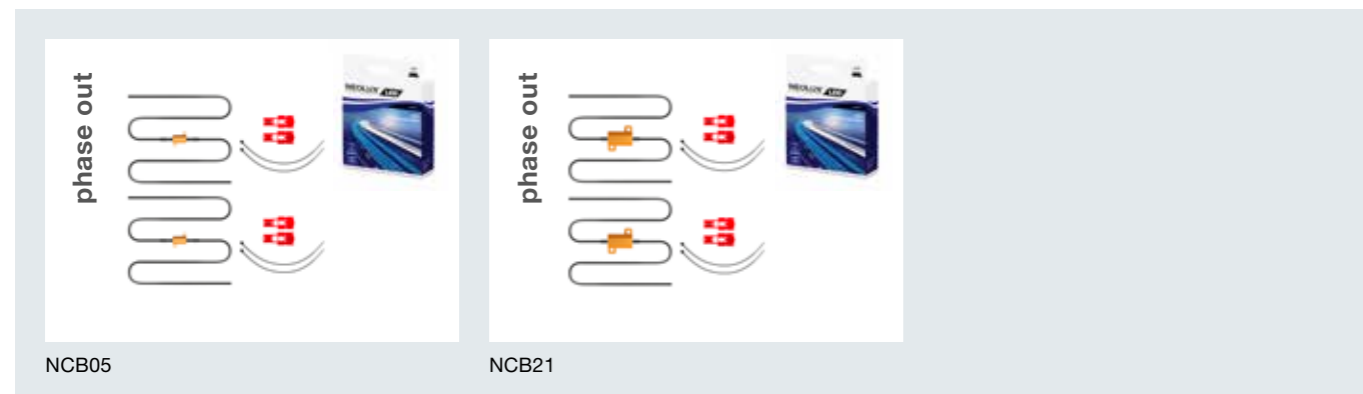

- Elimination of error messages caused by lower wattages of LED lamps
- Long lifetime
- Available for 5W or 21W
- Universal fit
- Good quality thanks to robust components

Product benefits

- No irritating warning lights
- No extra heat for lamps compared to lamps with included resistor
- Maintain full benefits of your NEOLUX LED Retrofits and NEOLUX Fog Lamp
- User friendly handling
- Longer replacement cycle of retrofit

Sales promotion and customer service

Want to generate the most sales? NEOLUX supports you with intelligent campaigns for sales promotion and reliable customer service.

Top sales – just like that!

NEOLUX supports its customers with effective marketing strategies, well-thought-out sales logistics, and reliable delivery. Use our attractive POS materials and advertising campaigns to generate additional sales.

The NEOLUX range displayed at a glance at the POS.

The NEOLUX planogram is meant to provide a visual representation of NEOLUX's entire range of retail products. The careful placement of each of the products – arranged by category and type – help in identifying an appropriate solution. It is intended as an example of how to place the NEOLUX products at the point of sale. A header may also be positioned at the top of the planogram.

What else can we do for you?

Our experts are happy to answer any questions you may have about NEOLUX products.

Please contact us at:
contact-en@neolux-lighting.com

Counter displays for 12V and 24V – Attractive and compact.
