OSRAM

A compact construction with complete efficiency

The VISTOSA® is aimed completely at high levels of functionality. This applies for example to its simple handling – as plug & play luminaires the spots are easy to use and are compatible with commercially available 3-phase tracks. VISTOSA® also features the complete range of relevant functional characteristics for prestigiously displaying goods in a variety of retail outlets.

In addition to various housing colours, versions with differing distribution angles, light colours and two quality levels for colour rendering are available (CRI > 80/90). Specific LED modules with adapted light colours are used to optimally display meat and bakery products in a fresh and tasty way.

Applications

- Retail sector, also primarily food retail
- Market outlets (supermarkets, DIY centres, electronics stores)
- Shops

With its especially flat design the VISTOSA® is also ideal for low room heights.

Order data for the VISTOSA® range is available conveniently and up-to-date as a PDF for downloading at www.osram.com/vistosa
