OSRAM

Custom-designed for functionality

PrevaLight® Panel as a long-life replacement for traditional louvre solutions is ideal for most applications in offices and commercial buildings with grid ceilings. With homogenous light distribution without dark spots, the luminaire ensures pleasant illumination and good color rendering.

PrevaLight® Panel is the ideal and cost-effective lighting solution for foyers, general building areas, meeting rooms and offices.

With standard dimensions and low connected loads, PrevaLight® Panel is also a low-maintenance and energy-efficient alternative to conventional louvre luminaires. As a result, energy savings of up to 42% are achieved in contrast to comparable T5 or T8 recessed luminaires.

PrevaLight® Panel

IP20, (IP40 on room side), service life 50,000 h (L70/B50 @ ta 25° C), with microprismatic optics, wide distribution; versions with 3500lm: (UGR ≤ 19), CRI > 80
